

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

JANUARY 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of January 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4198 living children, of whom 2110 were male and 2088 female. These births are 289 more than those registered in the previous month, December 1907, and 28 more than those registered in January of last year. The births registered during the month are equivalent to an annual birth-rate of 26·9 per thousand of the estimated population of these towns, a rate which is 1·5 higher than that of the previous month, but 0·2 lower than that of the corresponding month of last year. The birth-rate of the month ranged from 33·0 in Greenock to 20·1 in Edinburgh. In Paisley it was 31·1; in Glasgow 29·1; in Leith 28·1; in Aberdeen 26·6; in Dundee 25·6; and in Perth 20·8.

Of the 4198 births, 286, or 6·8 per cent., were illegitimate, an illegitimate rate which is 0·1 lower than that of December, and 1·0 lower than that of January of last year. The illegitimate rate ranged from 9·9 in Aberdeen to 3·5 in Greenock. In Edinburgh it was 8·7; in Perth 6·5; in Glasgow 6·4; in Paisley 6·3; in Dundee 6·3; and in Leith 4·5.

Marriages registered during the month numbered 1625; they are 39 more than those registered in December, and 73 more than those registered in January of last year. The marriage-rate of the month is 10·4, a rate which is 0·1 higher than that of December, and 0·3 higher than that of January of last year.

Deaths registered in these towns during the month numbered 3592; of them 1771 were deaths of males and 1821 deaths of females. These deaths are 496 more than those registered in December, and 423 more than those registered in January of last year. The equivalent annual death-rate of the month is 23·0, a rate which is 2·9 higher than the death-rate of December, and 2·4 higher than that of January of last year. The death-rate of the month ranged from 26·5 in Glasgow to 16·9 in Aberdeen. In Greenock it was 24·8; in Perth 24·8; in Leith 22·5; in Paisley 21·1; in Dundee 20·5; and in Edinburgh 19·0. With the exception of that of Dundee, all these rates are higher than the town death-rates of December.

Of the 3592 deaths registered during the month, 1366, or 38·0 per cent., were of children of less than five years old; and 959, or 26·7 per cent., were of persons of over sixty. The former are 127 more than in the previous month and 366 more

than in the corresponding month of last year; the latter are 220 more than in the previous month and 61 more than in the corresponding month of last year.

Deaths of children of less than one year old numbered 708. They are 19 more than in the previous month, and 123 more than in January of last year. The infantile mortality-rate of the month is 173 per thousand births, a rate which is 8 more than in the previous month, and 33 more than in January of last year. The infantile mortality-rate of the month ranged from 194 in Leith to 136 in Aberdeen. In Glasgow it was 189; in Dundee 161; in Edinburgh 160; in Greenock 153; in Paisley 152; and in Perth 149. In Glasgow and Leith this rate was higher than in the previous month, but in the remaining towns it was lower than in that month.

Deaths from the principal epidemic diseases numbered 590; they are 82 more than in the previous month, and 299 more than in January of last year. The equivalent annual death-rate from these causes is 3·8 per thousand, a rate which is 0·5 higher than that of December, and 1·9 higher than that of January of last year. This death-rate ranged from 5·7 in Glasgow and 5·4 in Greenock, to 1·2 in Edinburgh and 1·4 in Aberdeen. In Leith it was 4·0; in Perth 3·7; in Paisley 2·6; and in Dundee 2·0.

During the month 2 deaths were registered as due to small-pox; they were both in Leith. Deaths from measles numbered 359; they are 79 more than in the previous month, and 326 more than in January of last year. Of them 298 were registered in Glasgow, and 21 in Greenock. Deaths from scarlet fever numbered 18; from diphtheria 32, of which 11 were in Glasgow and 8 in Paisley; deaths from whooping-cough numbered 116, of which 53 were in Glasgow and 24 in Leith; deaths from enteric fever numbered 12; from diarrhoeas 25; and from cerebro-spinal meningitis 26. Of the last-named 15 were in Glasgow, 7 in Edinburgh, 2 in Dundee, and 2 in Greenock.

Deaths from influenza numbered 6; from puerperal septic conditions 5; from malignant disease 165, of which 90 were ascribed to carcinoma, 8 to sarcoma, and 67 to other forms of cancer or to cancer not otherwise specified. Deaths from heart disease numbered 362; from apoplexies 177; from premature birth debility 85; and from alcoholism 7.

Deaths from pneumonia numbered 413, and amounted to 11·5 per cent. of the total deaths; they are 42 more than in December, and 71 more than in January of last year. Deaths from bronchitis numbered 394, and constituted 11·0 per cent. of the total deaths; they are 95 more than those registered in December, and 62 more than those registered in January of last year.

Deaths registered as due to tuberculous disease numbered 377, of them 250 being ascribed to phthisis. The deaths from tuberculosis amounted to 10·5 per cent. of the total deaths, those from phthisis to 7·0 per cent. The deaths from tuberculosis are 44 more than in the previous month, but 5 fewer than in January of last year; those from phthisis are 34 more than in the previous month, and 22 more than in January of last year.

Deaths ascribed to violent causes numbered 121. Of them 7 were suicidal, 3 being by cutting, 3 by hanging, and 1 by precipitation.

The deaths registered during the month include those of five males and nine females aged 90 years and over, the oldest being a widow, aged 100 years.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 206 is given the usual monthly statement regarding the births, deaths, and marriages in forty-eight selected registration districts, which have a combined estimated population of 801,044.

The births registered in these districts during the month numbered 1909, the deaths 1359, and the marriages 635. The equivalent annual birth-rate is 28·1, the death-rate 20·0, and the marriage-rate 9·3.

Among the deaths registered in those districts during the month there were 74 from measles, 8 from scarlet fever, 37 from whooping-cough, 11 from diphtheria, 3 from enteric fever, 24 from diarrhoeas, 5 from croup and laryngitis, 296 from pneumonia, bronchitis, and pleurisy, 133 from tuberculosis, and 16 from cerebro-spinal meningitis, of which 5 were in Govan, 2 each in Dumbarton, Falkirk, Kilmarnock, and Shettleston, and 1 each in Coatbridge, Partick, and New Monkland.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND.

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 160 feet above the sea-level,

For the month of JANUARY 1908.

Mean barometric pressure, 29.991 inches; greater than the average for the same month of 1856-1905 by 0.166 inch.

Mean temperature, $37^{\circ}8$; less by $0^{\circ}1$.

Mean daily range of temperature, $9^{\circ}8$; greater by $0^{\circ}8$.

Rain, number of days, 15; less by 2 days.

Rain, depth in inches, 3.55; greater by 0.10 inch.

Wind, direction of: a 3 days' excess of winds from S.W. and W.

Hence the month of January 1908 was characterised by a high mean pressure; an average mean temperature, with a slightly high mean daily range; an average mean rainfall; and an excess of winds from West and South-West.

The mean pressure was 29.991 inches, or 0.166 inch above the normal, the sea-level extremes at Leith being 30.542 inches on 2nd, and 29.167 inches on 28th.

The mean temperature was $37^{\circ}8$, or $0^{\circ}1$ below the normal, the days being slightly above and the nights slightly below their respective averages. The first week was decidedly cold, the lowest temperatures for the month occurring on 4th and 5th, but at Aberdeen on the 2nd, and on 4th the sheltered thermometer at Paisley did not rise above $26^{\circ}0$ during the day-time. After a further continuance of rather cold weather, there was a rapid rise of temperature on 14th, with high readings for the next three days, and in general rather mild conditions until near the end of the month. The extreme readings were $53^{\circ}7$ at Greenock on 16th, and $18^{\circ}0$ at Perth on 4th.

The mean rainfall was 3.55 inches, or 3 per cent. above the normal, Aberdeen, Dundee, and Perth having decided deficiencies, and the other chief towns a moderate excess. There were heavy rains in the West on 5th, Greenock having 2.17 inches, and in the East on 7th, when Dundee, Edinburgh, and Leith registered half their aggregates for the entire month, the day's fall at Leith being $1\frac{1}{4}$ inches. From 14th to 17th, and from 25th to 27th, conditions were unsettled, and Greenock had falls of more than 1 inch on 15th and 25th. At Aberdeen there were rainless spells from 9th to 15th, and from 18th to 24th.

The weather was stormy from 5th to 8th, from 15th to 17th, and on 26th and 27th. During the earliest of these periods sleet and snow were common, but to no great depth, and again at the close of the month.

Fog occurred early in the month, on 13th and 14th, and on 24th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of JANUARY 1908.

MONTHLY RETURN

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

FEBRUARY 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of February 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3705 living children, of whom 1969 were male and 1736 female. These births are 493 fewer than those registered in January, but 68 more than those registered in February of last year. The equivalent annual birth-rate of the month is 25·4 per thousand of the estimated population of these towns, a rate which is 1·5 less than that of January, and 0·8 less than that of February of last year. The birth-rate of the month ranged from 30·5 in Leith to 19·8 in Edinburgh. In Greenock it was 29·7; in Glasgow 26·7; in Dundee 26·1; in Aberdeen 25·1; in Paisley 25·1; and in Perth 25·1.

Of the 3705 births, 293, or 7·9 per cent., were illegitimate, a rate of illegitimacy which is 1·1 higher than that of January, and 0·7 higher than that of February of last year. This rate for the month ranged from 13·9 in Edinburgh to 3·9 in Paisley and Leith. In Aberdeen it was 8·7; in Glasgow 7·3; in Perth 7·1; in Dundee 6·9; and in Greenock 4·1.

Marriages registered in these towns during the month numbered 778, a number which is 847 less than the number of marriages registered in January, and 29 less than that of the marriages registered in February of last year. The equivalent annual marriage-rate is 5·3 per thousand of the estimated population of these towns, a rate which is 5·1 less than the rate of January, and 0·5 less than that of February of last year.

Deaths registered in these towns during the month numbered 3110, of which 1517 were of males and 1593 of females. These deaths are 482 fewer than in January, but 170 more than in February of last year. The equivalent annual death-rate is 21·3 per thousand, a rate which is 1·7 less than that of January, but 0·2 more than that of February of last year. The death-rate of the month ranged from 26·5 in Perth to 18·4 in Aberdeen. In Dundee it was 24·6; in Leith 24·5; in Paisley 21·6; in Glasgow 21·4; in Greenock 20·9; and in Edinburgh 19·5. The death-rates of the month in Glasgow and Greenock are lower than those of January, but the death-rates of the month in the other towns are all higher than in that month.

Of the 3110 deaths registered in the towns during the month, 1159, or 37·3 per cent., were of children of less than five years old; and 840, or 27·0 per cent., were of persons of over sixty. The former are 207 fewer than in the previous month,

but 231 more than in the corresponding month of last year; the latter are 119 fewer than in the previous month, and 18 fewer than in the corresponding month of last year.

Deaths of children of less than one year old numbered 627, a number which is equivalent to an infantile mortality rate of 164 per thousand births, a rate which is 9 less than that of January but 22 more than that of February of last year. The infantile mortality-rate of the month ranged from 238 in Perth to 130 in Paisley. In Dundee it was 202; in Aberdeen 179; in Leith 175; in Greenock 170; in Glasgow 159; and in Edinburgh 146. Compared with the rates of the previous month, those of Glasgow, Edinburgh, Paisley, and Leith are less, but those of Dundee, Aberdeen, Greenock, and Perth are more.

Deaths from the principal epidemic diseases numbered 418, which is equivalent to an annual death-rate from these causes of 2·9 per thousand, a rate which is 0·9 lower than that of January, but 0·4 higher than that of February of last year. These deaths are 172 fewer than in January, but 77 more than in February of last year. The death-rate from these causes ranged from 4·2 in Glasgow to 1·1 in Edinburgh. In Leith it was 3·4; in Greenock 3·0; in Dundee 1·9; in Paisley 1·8; in Perth 1·8; and in Aberdeen 1·2.

Deaths from small-pox during the month numbered 3; they were all registered in Leith. Deaths from measles numbered 202; they were 157 fewer than in January. Of them 175 were registered in Glasgow, which is 123 fewer than the number registered in that town in January. Deaths from scarlet fever numbered 22; they are 4 more than in the previous month. Deaths from whooping-cough numbered 98, which is 18 fewer than in January. Deaths from enteric fever numbered 14; from diarrhoea and dysentery 17; and from cerebro-spinal meningitis 33, of which 22 were in Glasgow, 4 in Edinburgh, 3 in Paisley, 2 in Leith, and 1 each in Dundee and Aberdeen.

Deaths from diarrhoeal diseases, including those registered as due to diarrhoea, dysentery, infective enteritis, enteritis, and gastro-enteritis numbered 54; they are 11 fewer than in the previous month, but 5 more than in February of last year. Deaths from influenza numbered 31; from puerperal septic conditions 8; from malignant disease 158, of which 87 were ascribed to carcinoma, 14 to sarcoma, and 57 to other forms of cancer or to cancer not otherwise specified. Deaths from heart disease numbered 269; from apoplexies 167; from premature birth debility 89; and from alcoholism 4. Deaths from pneumonia numbered 411, and amounted to 13·2 per cent. of the total deaths; they are 2 fewer than in January, but 88 more than in February of last year. Deaths from bronchitis numbered 272, and amounted to 8·7 per cent. of the total deaths; they are 122 fewer than in January, and 40 fewer than in February of last year.

Deaths registered as due to tuberculous disease numbered 370, of them 227 being ascribed to phthisis. The deaths from tuberculosis were 7 fewer than in January, but 4 more than in February of last year; they amounted to 11·9 per cent. of the total deaths. The deaths from phthisis were 23 fewer than in January, 4 fewer than in February of last year, and amounted to 7·3 per cent. of the total deaths registered during the month.

Deaths ascribed to violent causes numbered 109. Of them 10 were suicidal, 7 being by hanging, 2 by cutting, and 1 by drowning.

The deaths registered during the month include those of 2 males and 12 females aged 90 years and over, the oldest of them being a female fundholder, aged 99.

BIRTHS, DEATHS, ETC., ON OTHER SELECTED REGISTRATION DISTRICTS.

On page 30 is given the usual monthly statement regarding the births, deaths, and marriages in forty-eight selected registration districts, which have an estimated combined population of 801,044.

The births registered in these districts during the month numbered 1697, the deaths 1305, and the marriages 269. The equivalent annual birth-rate is 26·7, the death-rate 20·5, and the marriage-rate 4·2.

Among the deaths registered in these districts during the month were 79 from measles, 5 from scarlet fever, 34 from whooping-cough, 8 from diphtheria, 7 from enteric fever, 20 from diarrhoeal diseases, 2 from croup and laryngitis, 254 from pneumonia, bronchitis, and pleurisy, 149 from tuberculous disease, and 9 from cerebro-spinal meningitis, of which 2 were in New Monkland, 2 in Shettleston, and 1 each in Eastwood, Falkirk, Partick, Inverness, and Kilmarnock.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 160 feet above the sea-level,

For the month of FEBRUARY 1908.

Mean barometric pressure, 29.902 inches; greater than the average for the same month of 1856–1905 by 0.040 inch.

Mean temperature, $41^{\circ}3$; greater by $2^{\circ}7$.

Mean daily range of temperature, $10^{\circ}1$; greater by $0^{\circ}4$.

Rain, number of days, 16; greater by 1 day.

Rain, depth in inches, 2.04 ; less by 0.83 inch.

Wind, direction of: a 10 days' excess of winds from W. and N.W.

Hence the month of February 1908 was characterised by a slightly high mean pressure; a very high mean temperature, with a slightly high mean daily range; a low mean rainfall; and a large excess of winds from W. and N.W.

The mean pressure was 29.902 inches, or 0.040 inch above the normal, the sea-level extremes at Leith being 30.659 inches on 6th, and 28.866 inches on 28th.

The mean temperature was $41^{\circ}3$, or $2^{\circ}7$ above the normal, the days being $2^{\circ}9$ and the nights $2^{\circ}5$ above their respective averages. The greater part of the month was unusually mild under the influence of Westerly winds, whilst the closing days were in very decided contrast, wintry conditions and Northerly winds prevailing. Highest temperatures occurred on 6th, 7th, and 8th, and lowest on 28th or 29th, the actual extremes being $54^{\circ}0$ at Aberdeen and Perth on 7th and 8th respectively, and $27^{\circ}0$ at Greenock on 29th.

The mean rainfall was 2.04 inches, or 29 per cent. below the normal. The Eastern towns experienced decided deficiencies, Dundee, Aberdeen, and Perth having less than half their average amounts. At the Western towns, however, the shortage was small, and Glasgow had a slight excess. But little rain fell during the first fortnight, but from 13th till the end of the month slight falls were reported on almost every day. The heaviest falls occurred on 21st or 22nd, Greenock having 0.71 inch on the former day. At the Eastern towns, with the exception of Perth, there was not as much as a quarter of an inch on any one day.

A severe gale from the West was general on 22nd, accompanied by hail and sleet; whilst very heavy falls of snow occurred during the last three days of the month, with gales or strong winds from N.W.

Thunder was reported at Aberdeen on 29th.

Sunshine was above the average, especially in the East.

MONTHLY RETURN

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

MARCH 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of March 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4167 living children, of whom 2110 were males and 2057 females. These births are 462 more than those registered in February, and 210 more than those registered in March 1907. They are equivalent to an annual birth-rate of 26·7, a rate which is 1·3 higher than that for February, and 1·0 higher than that for March of last year. The birth-rate for the month ranged from 29·8 in Leith to 20·7 in Edinburgh. In Paisley it was 29·7; in Dundee 28·9; in Glasgow 28·3; in Greenock 28·1; in Aberdeen 26·2; and in Perth 21·4.

Of the 4167 births, 277, or 6·6 per cent., were illegitimate. This rate of illegitimacy ranged from 17·2 in Perth to 3·5 in Paisley and in Greenock. In Aberdeen it was 7·8; in Glasgow 7·1; in Edinburgh 6·6; in Dundee 5·3; and in Leith 5·1.

Marriages registered in these towns during the month numbered 937. They are 159 more than those registered in February, and 125 more than those registered in March of last year. The marriage-rate for the month was 6·0, a rate which is 0·7 above that for February, and the same amount above that for March of last year.

Deaths registered in these towns during the month numbered 3034, 1543 being of male persons, and 1491 of female persons. They are 76 fewer than those registered in February, but 13 more than those registered in March of last year. The equivalent annual death-rate is 19·4 per thousand, a rate which is 1·9 less than that for February, and 0·2 less than that for March of last year. The death-rate for the month ranged from 23·1 in Dundee to 15·8 in Edinburgh. In Perth it was 21·4; in Glasgow 21·0; in Paisley 18·4; in Leith 17·7; in Greenock 17·4; and in Aberdeen 17·2. In each of the eight towns the death-rate for the month was lower than that for the previous month.

Of the 3034 deaths, 1129, or 37·2 per cent., were of children of less than five years old; and 801, or 26·4 per cent., were of persons of over sixty. The former are 30 fewer than in February, but 112 more than in March of last year. The latter are 39 fewer than in February, but 14 more than in March of last year.

Deaths of children of less than one year old numbered 602, a number which is equivalent to an infantile mortality rate of 147 per thousand births. This rate is 17 lower than that for February, but is 13 higher than that for March of last year.

The infantile mortality-rate for the month ranged from 207 in Dundee to 102 in Edinburgh. In Perth it was 194; in Paisley 167; in Aberdeen 162; in Leith 148; in Glasgow 146; and in Greenock 120. In Dundee and Paisley, the infantile mortality-rate was higher than in the previous month, February, but in the remaining six towns it was lower than in that month.

During the month one death from small-pox was registered. It occurred in Leith, and was that of a person reported not to have been successfully vaccinated on account of being insusceptible. Deaths from measles numbered 209; they are 7 more than in February, and 184 more than in March of last year. Of them 155 were registered in Glasgow. Deaths from scarlet fever numbered 21, and from diphtheria 17. Deaths from hooping-cough numbered 94; they are 4 fewer than in February, and 39 fewer than in March of last year. Deaths from enteric fever numbered 5, and from cerebro-spinal meningitis 27, of which 18 were in Glasgow, 3 in Edinburgh, 2 in Paisley, and 4 in Leith. There were no deaths from typhus fever. Deaths attributed to influenza numbered 16.

Deaths from diarrhoeas numbered 27; they are 10 more than in February, and 5 more than in March of last year. Deaths from puerperal septic conditions numbered 8; from malignant disease 149, of which 87 were attributed to carcinoma, 9 to sarcoma, and 53 to other or unspecified forms of cancer. Deaths from heart disease numbered 274; from apoplexies 177; from premature birth debility 95; and from alcoholism 6.

Deaths from pneumonia numbered 353; they are 58 fewer than were registered in February, but 12 more than were registered in March of last year. Deaths from bronchitis numbered 286; they are 14 more than were registered in February, but 43 more than were registered in March of last year. The deaths from pneumonia constituted 11·6 per cent. of the total deaths for the month, and those from bronchitis 9·4 per cent.

Deaths from tuberculous diseases numbered 350; they are 20 fewer than in February, and 68 fewer than in March of last year, and amounted to 11·5 per cent. of the total deaths. Of these deaths from tuberculous disease, 239 were attributed to phthisis; 50 to tuberculous meningitis, 34 to tuberculous peritonitis and tabes mesenterica, and 27 to other forms of tuberculous disease.

Deaths from violence numbered 119. Of them 3 were reported to be suicidal, 2 being by hanging, and 1 by cutting.

Of the persons whose deaths were registered during the month 5 males and 9 females were aged 90 years and over, the oldest being a spinster aged 101, who formerly was a keeper of apartments.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 46 is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-eight selected registration districts. These districts have a combined estimated population of 801,044. Births registered in them during March numbered 1890, marriages 337, and deaths 1375. The equivalent annual birth-rate is 27·8, the marriage-rate 5·0, and the death-rate 20·2. Compared with the rates for March 1907, the birth-rate is 2·4 higher, the marriage-rate 0·1 lower, and the death-rate 2·6 higher.

Among the causes of death registered in these selected districts during the month there were none from small-pox, 91 from measles, 5 from scarlet fever, 45 from hooping-cough, 10 from diphtheria, none from either enteric or typhus fever, 20 from diarrhoeas, 2 from laryngitis, 261 from pneumonia, bronchitis, and pleurisy, 165 from tuberculous disease, and 11 from cerebro-spinal meningitis, of which 5 were in Shettleston, 3 in Govan, and 1 each in Kilmarnock, New Monkland, and Rothesay.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 160 feet above the sea-level,

For the month of MARCH 1908.

Mean barometric pressure, 29.761 inches; less than the average for the same month of 1856–1905 by 0.053 inch.

Mean temperature, $39^{\circ}3$; less by $1^{\circ}0$.

Mean daily range of temperature, $10^{\circ}7$; less by $0^{\circ}9$.

Rain, number of days, 19; greater by 3 days.

Rain, depth in inches, 4.21; greater by 1.77 inch.

Wind, direction of: a 5 days' excess of winds from S.E. and S.

Hence the month of March 1908 was characterised by a rather low mean pressure; a low mean temperature, with a low mean daily range; a very high mean rainfall; a considerable excess of winds from S.E. and S.

The mean pressure was 29.761 inches, or 0.053 inch below the normal, the sea-level extremes at Leith being 30.227 inches on 14th, and 28.676 inches on 9th.

The mean temperature was $39^{\circ}3$, or $1^{\circ}0$ below the normal, the days being $1^{\circ}5$ and the nights $0^{\circ}6$ below their respective averages. The mean for the month was $2^{\circ}0$ below that for February, and much cold weather was experienced. The first and third weeks were especially cold, with very low, day temperatures at times, the sheltered thermometer at Leith remaining below 40° from 3rd to 6th and on 18th and 19th. Lowest temperatures occurred as a rule on 5th, but at Perth on 13th and at Aberdeen on 21st, whilst maxima were registered on 23rd. From the latter date onwards somewhat milder conditions prevailed. The extreme readings were $55^{\circ}8$ at Glasgow on 23rd and $24^{\circ}0$ at Perth on 13th.

The mean rainfall was 4.21 inches, or 72 per cent. above the normal. At Dundee the month was the wettest March for more than forty years, whilst during that period the mean for the eight towns has been higher only in 1897 and 1903. The relative excess ranged from 48 per cent. at Greenock to 107 per cent. at Dundee. In the West the heaviest falls occurred on 8th (1.46 inch at Greenock), whilst on 24th all the Eastern towns except Aberdeen had amounts exceeding 1 inch (1.27 inch at Dundee). Between 10th and 21st there were many fine days, whilst outside these dates conditions were more or less unsettled.

Early in the month sleet and hail were frequent in the East; whilst winds of gale force prevailed more or less generally around 8th, and from 28th to 31st, with snow and hail again at places during the latter period.

On 18th Edinburgh was visited by a thick yellow fog.

Sunshine was rather deficient.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

APRIL 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of April 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4475 living children, of whom 2284 were male and 2191 female. These births are 308 more than in March, but 17 fewer than in April 1907. They are equivalent to an annual birth-rate of 29·6 per thousand of the estimated population of these towns, a rate which is 2·9 more than that for March, but 0·6 less than that for April 1907. The birth-rate for the month ranged from 33·2 in Greenock to 24·5 in Edinburgh. In Glasgow it was 32·1; in Paisley 31·1; in Dundee 30·4; in Leith 28·5; in Perth 28·0; and in Aberdeen 25·6.

Of the 4475 deaths, 316, or 7·1 per cent., were illegitimate. This rate of illegitimacy is 0·5 more than that for the previous month, and 0·2 more than that for the corresponding month of last year.

Marriages registered in these eight towns during the month numbered 1388. They are 451 more than those registered in March, but 222 fewer than those registered in April of last year. The marriage-rate for the month was 9·2, a rate which is 3·2 more than that for March, but 1·6 less than that for April of last year.

Deaths registered in these towns during April numbered 2774, of which 1406 were of males, and 1368 of females. These deaths are 260 fewer than those registered in March, and 309 fewer than those registered in April of last year. The equivalent annual death-rate was 18·4, a rate which is 1·0 less than that for March, and 2·3 less than that for April of last year. The death-rate for the month ranged from 20·4 in Glasgow to 14·1 in Leith. In Perth it was 18·7; in Dundee 18·3; in Greenock 17·6; in Paisley 17·5; in Edinburgh 16·7; and in Aberdeen 14·8. In Edinburgh and Greenock the death-rate was higher than in the previous month, but in the other towns it was lower than in that month.

Of the 2774 deaths, 1016, or 36·6 per cent., were of children of less than five years old; and 723, or 26·1 per cent., were of persons of over sixty. The former are 113 fewer than in March, and 91 fewer than in April of last year; the latter are 78 fewer than in March, and 12 fewer than in April of last year.

Deaths of children of less than one year old numbered 574, a number which is equivalent to an infantile mortality rate of 145 per thousand births. These deaths are 28 fewer than those for March, and 16 fewer than those for April of last year. This rate is 2 less than that for March, and 1 less than that for April of last year. The infantile mortality-rate for the month ranged from 159 in Glasgow to 90 in Leith. In Edinburgh it was 156; in Dundee 137; in Aberdeen 130; in Perth 123; in Greenock 119; and in Paisley 99. In Glasgow and Edinburgh this rate was higher than that for March, but in the remaining six towns this rate was lower than in March.

Deaths from the principal epidemic diseases numbered 316, which is 85 less than in March, and 202 less than in April of last year. The equivalent annual death-rate from these causes amounted to 2.1 per thousand, a rate which is 0.5 less than that for March, and 1.4 less than that for April of last year. The death-rate from these causes ranged from 2.8 in Glasgow to 0 in Perth. In Paisley it was 2.6; in Dundee 1.9; in Edinburgh 1.5; in Aberdeen 1.3; in Leith 1.2; and in Greenock 0.7.

There were no deaths in these towns from small-pox during the month. Deaths from measles numbered 147; they are 62 fewer than in the previous month, but 102 more than in April of last year; of them 102 were in Glasgow, 25 in Edinburgh, and 12 in Paisley. Deaths from scarlet fever numbered 20, from diphtheria 22, and from enteric fever 3. Deaths from hooping-cough numbered 74, a number which is 20 less than in March, and 150 less than in April of last year. Deaths from cerebro-spinal meningitis numbered 28, which is 1 more than in March, but 149 fewer than in April of last year; of them 20 were in Glasgow, 4 in Leith, 2 in Edinburgh, and 1 each in Dundee and Greenock. Deaths from diarrhoea and dysentery numbered 22; they are 5 fewer than in March, and 2 fewer than in April of last year.

Deaths from influenza numbered 10; from puerperal septic infection 6; from malignant disease 130, of which 82 were ascribed to carcinoma, 6 to sarcoma, and 42 to other or unspecified forms of cancer. Deaths from heart disease numbered 269; from apoplexies 164; from premature birth debility 109; and from alcoholism 6.

Deaths from pneumonia numbered 303, which is 50 fewer than in March, but 11 more than in April of last year. Deaths from bronchitis numbered 220, and are 66 fewer than in the previous month, but 17 more than in April of last year. The deaths from pneumonia constitute 10.9 per cent. of the total deaths for the month, while those from bronchitis constitute 7.9 per cent. of the total.

Deaths from all tuberculous diseases numbered 363, which is 13 more than in March, but 67 fewer than in April of last year; they amount to 13.1 per cent. of the total deaths registered during the month. Of these deaths from tuberculous disease, 224 were ascribed to phthisis, 63 to tuberculous meningitis, 37 to tabes mesenterica and tuberculous peritonitis, and 39 to other forms of tuberculous disease.

Deaths from violence numbered 117. Of them 6 were registered as being due to suicide, 3 being by hanging, 2 by drowning, and 1 by precipitation.

Of the persons dying in these towns during the month there were 3 males and 3 females aged ninety years and over, the oldest of them being a widow aged 93.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 62 there is given the usual monthly statement regarding the births, deaths, and marriages in forty-eight selected registration districts. These districts have a combined estimated population of 801,044. Births registered in them during April numbered 1994, marriages 426, and deaths 1322. The equivalent annual birth-rate is 30.3, the marriage-rate 6.5, and the death-rate 20.1. Compared with the rates for April 1907 this birth-rate is 1.4 less, this marriage-rate 1.0 less, but this death-rate is 1.7 more.

Among the deaths registered in these districts there were 109 from measles, of which 36 were in Coatbridge, 7 from scarlet fever, 46 from hooping-cough, 7 from diphtheria, 3 from enteric fever, 1 from typhus fever, 22 from diarrhoeal diseases, 223 from pneumonia, bronchitis, and pleurisy, 176 from tuberculous diseases, and 5 from cerebro-spinal meningitis, of which 3 were in Shettleston, and 1 each in Kirkecaldy and Rothesay.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 151 feet above the sea-level,

For the month of APRIL 1908.

Mean barometric pressure, 29.994 inches; greater than the average for the same month of 1856-1905 by 0.101 inch.

Mean temperature, $42^{\circ}1$; less by $2^{\circ}7$.

Mean daily range of temperature, $13^{\circ}1$; less by $0^{\circ}9$.

Rain, number of days, 13; less by 1 day.

Rain, depth in inches, 1.48; less by 0.61 inch.

Wind, direction of: a 5 days' excess of winds from between N.W. and N.E.

Hence the month of April 1908 was characterised by a high mean pressure, an extremely low mean temperature, with a rather low mean daily range; a low mean rainfall; a large excess of winds from between N.W. and N.E.

The mean pressure was 29.994 inches, or 0.101 inch above the normal, the sea-level extremes at Leith being 30.609 inches on 16th, and 29.417 inches on 25th.

The mean temperature was $42^{\circ}1$, or $2^{\circ}7$ below the normal, the days being $3^{\circ}2$ and the nights $2^{\circ}3$ below their respective averages. The month was notable for abnormally cold weather experienced during the week ending on 25th, which was probably the coldest on record for the month of April. The mean temperature of the week was from 8° to 10° below the normal; the minimum readings at the Eastern towns on 24th or 25th the lowest noted during the present year; and a shade reading of $8^{\circ}5$ reported at Perth on 24th the lowest recorded in any April in Scotland for at least 50 years. Very low day temperatures were recorded about this time, and frequently throughout the month, the maximum at Edinburgh (Blackford Hill) on 24th being as low as $32^{\circ}3$. Whilst temperature differed little from the normal at the beginning of the month, the only moderately high readings noted were on 17th, when all the towns exceeded 60° , the actual highest being 67° at Perth.

The mean rainfall was 1.48 inch, or 29 per cent. below the normal. There was a slight excess at Edinburgh and Leith, but a deficiency at the other towns, Dundee and Perth having less than half their average amounts. From 12th to 21st absolutely no rain fell at Paisley or Greenock, and but little at the other towns except at Edinburgh and Leith on 17th. Towards the North East, the heaviest falls occurred on 8th; in the Edinburgh area on 23rd, when the precipitation consisted largely of snow; and in the West on 2nd or 30th. The heaviest daily fall reported was 0.56 inch at Greenock on 2nd.

On the evening of 23rd, a snowstorm of extraordinary severity for the advanced time of year set in over a great part of the country. Whilst some districts reported practically no snow, or merely frequent showers, there was in the neighbourhood of Edinburgh a fall of several inches. For some days, with winds from the North, conditions were of a very wintry character, for which there hardly seems a parallel in official weather records for the month of April.

Fog occurred at times.

FOR OFFICIAL USE.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

MAY 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of May 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4232 living children, of whom 2131 were male and 2101 female. These births are 243 fewer than in April, and 196 fewer than in May 1907. The equivalent annual birth-rate is 27·1 per thousand of the estimated population of these towns, this rate being 2·5 below that for the previous month, and 1·7 below that for the corresponding month of last year. The birth-rate for the month ranged from 30·9 in Greenock to 22·4 in Edinburgh. In Paisley it was 30·1; in Dundee 29·3; in Glasgow 28·2; in Leith 27·3; in Perth 25·8; and in Aberdeen 25·7.

Of the 4232 births, 283, or 6·7 per cent., were illegitimate. This rate of illegitimacy is 0·4 less than that for the previous month, but is 0·3 more than that for the corresponding month of last year.

Marriages registered in these eight towns during the month numbered 571. They are 817 fewer than were registered in the previous month, but are 37 more than were registered in May of last year. The marriage-rate for the month was 3·7 per thousand, a rate which is 5·5 below that for the previous month, but 0·2 above that for the corresponding month of last year.

Deaths registered in these towns during May numbered 2434, of which 1230 were of males, and 1204 of females. These deaths are 340 fewer than in the previous month, and 456 fewer than in the corresponding month of last year. The equivalent annual death-rate is 15·6, a rate which is 2·8 less than that for April, and 3·2 less than that for the corresponding month of last year. The death-rate for the month ranged from 16·4 in Dundee and in Perth to 13·4 in Paisley. In Glasgow it was 16·3; in Leith 15·2; in Edinburgh 14·8; in Greenock 14·6; and in Aberdeen 14·3. In all these towns, with the exception of Leith, the death-rate was lower than in the previous month.

Of the 2434 deaths, 821, or 33·7 per cent., were of children of less than five years of age; and 635, or 26·1 per cent., were of persons aged over sixty years. The former are 195 fewer than in the previous month, and 156 fewer than in the corresponding month of last year; the latter are 88 fewer than in the previous month, and 84 fewer than in the corresponding month of last year.

Deaths of children of less than one year old numbered 493, which is 81 less than in the previous month, and 15 less than in the corresponding month of last year. The equivalent death-rate per thousand births was 121, which is 24 less than in the previous month, and 1 less than in May 1907. This infantile mortality-rate for the month ranged from 147 in Paisley to 93 in Greenock. In Aberdeen it was 131; in Glasgow 129; in Leith 112; in Edinburgh 105; in Perth 104; and in Dundee 98. In Aberdeen, in Paisley and in Leith this rate was higher than in the previous month, but in the remaining five towns it was less.

Deaths from the principal epidemic diseases numbered 213, which is 103 less than in April, and 214 less than in May of last year. The equivalent annual death-rate from these causes is 1·4 per thousand, a rate which is 0·7 less than that for April, and 1·4 less than that for May 1907. The death-rate from these causes ranged from 1·7 in Glasgow to 0·7 in Perth. In Leith and in Greenock it was 1·5; in Aberdeen 1·3; in Paisley 1·0; in Edinburgh 0·9; and in Dundee 0·8.

There were no deaths from small-pox in these towns during the month. Deaths from measles numbered 80; they are 67 fewer than in the previous month, but 44 more than in the corresponding month of last year. Deaths from scarlet fever numbered 15, from diphtheria 14, from enteric fever 3, and from pyrexia 1. Deaths from hooping-cough numbered 60; they are 14 fewer than in the previous month, and 132 fewer than in the corresponding month of last year. Deaths from cerebro-spinal meningitis numbered 17; they are 11 fewer than in April, and 126 fewer than in May 1907. The number of deaths from this disease is smaller than the corresponding number for any month since October 1906. Of these deaths, 13 occurred in Glasgow, 2 in Edinburgh, and 1 each in Dundee and in Leith. Deaths from diarrhoea and dysentery numbered 23; they are 1 more than in the previous month and 6 more than in the corresponding month of last year.

Deaths from influenza numbered 4; from puerperal septic conditions 6; from malignant disease 146, of which 76 were attributed to carcinoma, 9 to sarcoma, and 61 to other or unspecified forms of cancer. Deaths from heart disease numbered 250; from apoplexies 147; from premature birth debility 94; and from alcoholism 10.

Deaths from pneumonia numbered 230, which is 73 fewer than the number for the previous month, and 74 fewer than that for the corresponding month of last year. Deaths from bronchitis numbered 152, a number which is 68 less than that for April, but 5 more than that for May 1907. The deaths from pneumonia constitute 9·4 per cent. of the total deaths, and those from bronchitis 6·2 per cent.

Deaths from all tuberculous diseases amounted to 362, a number which is 1 less than that for April, and 118 less than that for May of last year; they amount to 14·9 per cent. of the total deaths. Of these deaths from tuberculous disease, 226 were ascribed to phthisis, 57 to tuberculous meningitis, 34 to tuberculous peritonitis and tabes mesenterica, and 45 to other forms of tuberculous disease.

Deaths from violence numbered 84. Ten of these deaths were reported to be suicidal, 6 being registered in Edinburgh. Four deaths of this class were caused by hanging, 2 by cuts, and 1 each by drowning, on the railway, by chloroform, and in an unstated manner.

Of the persons dying in these towns during the month there were 3 males and 7 females who were aged ninety years and upwards. The eldest was a retired female teacher of music who was 98 years of age.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 78 there is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have a combined estimated population of 801,044. Births registered in them during May numbered 1999, marriages 165, and deaths 1146. The equivalent annual birth-rate is 29·4 per thousand, the marriage-rate 2·4 per thousand, and the death-rate 16·9 per thousand. Compared with the rates for May 1907 the birth-rate is 1·1 less, the marriage-rate is the same, and the death-rate is 1·5 less.

Among the deaths registered in these districts there were 50 from measles, 7 from scarlet fever, 39 from hooping-cough, 8 from diphtheria, 7 from enteric fever, 32 from diarrhoeal diseases, 2 from croup, 1 from laryngitis, 165 from pneumonia, bronchitis, and pleurisy, 161 from tuberculous diseases, and 5 from cerebro-spinal meningitis, which occurred, 1 in each of the districts of Dumbarton, Dunfermline, Partick, New Monkland, and Shettleston.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 151 feet above the sea-level,

For the month of MAY 1908.

Mean barometric pressure, 29.913 inches; less than the average for the same month of 1856-1905 by 0.037 inch.

Mean temperature, $52^{\circ}0$; greater by $2^{\circ}6$.

Mean daily range of temperature, $14^{\circ}6$; less by $0^{\circ}4$.

Rain, number of days, 19; greater by 5 days.

Rain, depth in inches, 2.23; greater by 0.07 inch.

Wind, direction of: a 4 days' excess of winds from between S. and W.

Hence the month of May 1908 was characterised by a slightly low mean pressure; a decidedly high mean temperature, with a fractionally low mean daily range; a rainfall practically equal to the average; an excess of winds from a South Westerly quarter.

The mean pressure was 29.913 inches, or 0.037 inch below the normal, the sea-level extremes at Leith being 30.539 inches on 28th, and 29.217 inches on 5th.

The mean temperature was $52^{\circ}0$, or $2^{\circ}6$ above the normal, the days being $2^{\circ}4$ and the nights $2^{\circ}8$ above their respective averages. Temperature was rather variable, but the month was on the whole the mildest May since 1901. Some cold days occurred early in the month, but low night readings were infrequent. During the fourth week there was a well-marked temperature excess, shade readings above 80° occurring on 28th; but on the East coast the maxima on the following day were much lower. Thus at Leith the shade thermometer reached 76° on 28th, but only 56° on 29th. As regards the chief towns the shade extremes were 81° at Perth and Paisley on 28th, and 35° at Perth on 22nd.

The mean rainfall was 2.23 inches, or 3 per cent. above the normal, the variations at the individual towns ranging from an excess of 35 per cent. at Paisley to a deficiency of 33 per cent. at Aberdeen. The number of days on which rain fell was at places rather large (24 days at Greenock and 23 days at Perth), but as a rule the daily falls were small. The heaviest general fall occurred on 8th (0.63 inch at Greenock), but at Aberdeen the 21st was the wettest day. At Edinburgh no day from 13th to 29th had as much as one-tenth of an inch, whilst at Aberdeen no rain fell after 22nd.

A sharp thunderstorm occurred on the night of 30th. Thunder at Paisley also on 24th, and hail there on several days.

Fog was somewhat frequent.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of May 1908.

MONTHLY RETURN

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

JUNE 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of June 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4532 living children, of whom 2310 were male and 2222 female. These births are 300 more than those registered in May, and 465 more than those registered in June of last year. The equivalent annual birth-rate is 30·0 per thousand of the estimated population of the eight towns, a rate which is 2·9 more than that for May, and 2·7 more than that for June of last year. The birth-rate for the month in these towns ranged from 36·0 in Greenock to 22·8 in Perth. In Leith it was 32·6; in Dundee 32·3; in Glasgow 32·0; in Paisley 31·4; in Aberdeen 27·1; and in Edinburgh 24·0.

Of the 4532 births, 312, or 6·9 per cent., were illegitimate. This illegitimate rate is 0·2 above that for the previous month, but 0·8 below that for the corresponding month of last year.

Marriages registered in these towns during the month numbered 2187, and are 1616 more than those registered in May, and 186 more than those registered in June of last year. The equivalent annual marriage-rate is 14·5, a rate which is 10·8 above that for May, and 1·1 above that for June of last year.

Deaths registered in these eight towns during the month numbered 2184, 1130 being of males and 1054 of females. These deaths are 250 fewer than those registered in May, and 239 fewer than those registered in June of last year. The equivalent annual death-rate is 14·5 per thousand, a rate which is 1·1 less than that for May, and 1·8 less than that for June of last year. The death-rate for the month ranged from 16·5 in Greenock to 11·4 in Leith. In Dundee it was 15·9; in Perth 15·2; in Edinburgh 15·0; in Glasgow 14·6; in Paisley 14·4; and in Aberdeen 12·1. In Edinburgh, Paisley, and Greenock the death-rate for the month was above that for the previous month, May, but in the remaining five towns it was below that for the previous month.

Of the 2184 deaths, 664, or 30·4 per cent., were of children of less than five years old; and 584, or 26·7 per cent., were of persons of over sixty. The former are 157 fewer than in the previous month, and 167 fewer than in the corresponding month of the previous year; the latter are 51 fewer than in the previous month, but 4 more than in the corresponding month of the previous year.

Deaths of children of less than one year old numbered 390; they are 103 fewer than those deaths in May, and 83 fewer than those deaths in June of last year. The infantile mortality rate amounts to 99 per thousand of the average monthly number of births in these towns, a rate which is 22 less than that for May, and 18 less than that for June of last year; it is also lower than the infantile mortality rates for the previous four Junes. This rate for the month varied from 126 in Dundee to 69 in Leith. In Edinburgh it was 122; in Greenock 119; in Perth 108; in Aberdeen 103; in Paisley 89; and in Glasgow 87. In Edinburgh, Dundee, Greenock, and Perth this rate was higher than in May; but in Glasgow, Aberdeen, Paisley, and Leith it was lower than in that month.

Deaths from the principal epidemic diseases numbered 160; they are 53 fewer than in May, and 167 fewer than in June of last year. The equivalent annual death-rate from these causes is 1.1 per thousand, a death-rate which is 0.3 less than that for May, and 1.1 less than that for June of last year. This rate ranged from 1.8 in Paisley to 0.6 in Leith. In Dundee it was 1.4; in Glasgow 1.1; in Edinburgh and in Aberdeen 0.9; in Greenock and in Perth 0.7.

There were no deaths from small-pox in these towns during the month. Deaths from measles numbered 38, and are 42 fewer than in May, but 13 more than in June of last year. Deaths from scarlet fever numbered 9, from diphtheria 15, and from enteric fever 6. Deaths from hooping-cough numbered 60; they number the same as in the previous month, but are 115 fewer than in the corresponding month of last year. Deaths from cerebro-spinal meningitis numbered 9; they are 8 fewer than in the previous month, 74 fewer than in the corresponding month of last year, and are the smallest number of these deaths registered in any month since May 1906. Of these 9 deaths, 7 were registered in Glasgow, and 1 each in Edinburgh and in Greenock.

Deaths from influenza numbered 1; from puerperal septic conditions 5; from malignant disease 145, of which 76 were ascribed to carcinoma, 8 to sarcoma, and 61 to other or unspecified forms of cancer. Deaths from heart disease numbered 238; from apoplexies 123; from premature birth debility 75; and from alcoholism 3.

Deaths from pneumonia numbered 188, and constituted 8.6 per cent of the total deaths for the month; they are 42 fewer than in the previous month, and 59 fewer than in the corresponding month of last year. Deaths from bronchitis numbered 109, and constituted 5.0 per cent. of the total deaths for the month; they are 43 fewer than in the previous month, and 21 fewer than in the corresponding month of last year.

Deaths from tuberculous disease numbered 363, and constituted 16.6 per cent of the total deaths for the month; they are 1 more than in the previous month, and 2 more than in the corresponding month of last year. Of these deaths, 207 were ascribed to phthisis, a number which is 19 fewer than in the previous month, and 13 fewer than in the corresponding month of last year.

Deaths from violence numbered 81; 7 of them were suicidal, 5 being by hanging and 2 by cutting.

Of the persons whose deaths were registered during the month, 3 men and 8 women were aged ninety years or more, the oldest being a retired domestic servant aged 96.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 94 there is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated combined population of 801,044. Births registered in them during the month numbered 1977, marriages 828, and deaths 1062. The equivalent annual birth-rate is 30.0 per thousand, the marriage-rate 12.6 per thousand, and the death-rate 16.1 per thousand. Compared with the rates for June 1907, the birth-rate is 1.9 higher, the marriage-rate 0.8 higher, and the death-rate 0.7 higher.

Among the deaths registered in these districts during the month there were 30 from measles, 4 from scarlet fever, 41 from hooping-cough, 10 from diphtheria, 4 from enteric fever, 33 from diarrhoeal diseases, 2 from croup and laryngitis, 135 from pneumonia, bronchitis, and pleurisy, 171 from tuberculous disease, and 3 from cerebro-spinal meningitis, of which 2 were registered in Govan and 1 in Falkirk.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 151 feet above the sea-level,

For the month of JUNE 1908.

Mean barometric pressure, 30·048 inches ; greater than the average for the same month of 1856–1905 by 0·099 inch.

Mean temperature, $56^{\circ}1$; greater by $0^{\circ}6$.

Mean daily range of temperature, $15^{\circ}4$; greater by $0^{\circ}1$.

Rain, number of days, 13 ; being the average.

Rain, depth in inches, 1·91 ; less by 0·34 inch.

Wind, direction of : a 3 days' excess of winds from between NE. and NW.

Hence the month of June 1908 was characterised by a high mean pressure ; a slightly high mean temperature, with an average mean daily range ; a slightly low mean rainfall ; a slight excess of winds from NE. and NW.

The mean pressure was 30·048 inches, or 0·099 inch above the normal, the sea-level extremes at Leith being 30·445 inches on 27th, and 29·328 inches on 13th.

The mean temperature was $56^{\circ}1$, or $0^{\circ}6$ above the normal, the days being $0^{\circ}7$ and the nights $0^{\circ}6$ above their respective averages. The differences for the individual towns ranged from an excess of $1^{\circ}9$ at Perth to a deficiency of $0^{\circ}6$ at Glasgow. During a great part of the month rather changeable conditions were experienced, with somewhat low temperatures during the second and third weeks ; whilst the last few days were characterised by bright, warm weather. Lowest readings occurred on varying dates, the actual lowest being $37^{\circ}0$ at Aberdeen on 12th ; and highest readings on 25th or 27th, Perth registering $85^{\circ}0$ and Paisley $83^{\circ}5$ on the latter date.

The mean rainfall was 1·91 inch, or 15 per cent. below the normal. Greenock and Paisley had an excess, but the other towns a varying deficiency, amounting in the Edinburgh district to about 50 per cent. The last ten days of the month were rainless, or practically so, at all the towns, whilst the heaviest falls occurred on 2nd, 11th or 13th. At Leith, a fall of 0·45 inch on 13th was almost half the month's aggregate at that place, whilst the greatest daily amount recorded was 0·85 inch at Greenock on the same day.

A thunderstorm occurred in the West on 2nd, and thunder at Aberdeen on 4th and 19th.

Towards the end of the month there were several very sunny days.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

MONTHLY RETURN

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

JULY 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of July 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4256 living children, of whom 2137 were males and 2119 females. These births are 276 fewer than were registered in June, and 58 fewer than were registered in July of last year. The equivalent annual birth-rate is 27·3 per thousand of the estimated population of the eight towns, a rate which is 2·7 less than that for June, and 0·7 less than that for the corresponding month of last year. The birth-rate for the month in these towns ranged from 34·1 in Greenock to 22·1 in Perth. In Leith it was 29·6; in Glasgow 28·8; in Aberdeen 26·2; in Dundee 26·0; in Paisley 25·7; and in Edinburgh 23·5.

Of the 4256 births, 309, or 7·3 per cent., were illegitimate. This illegitimate rate is 0·4 above that for the previous month, and 0·3 above that for the corresponding month of last year.

Marriages registered in these towns during the month numbered 1875; they are 312 fewer than those registered in June, and 428 fewer than those registered in July 1907. The equivalent annual marriage-rate is 12·0, a rate which is 2·5 below that for the previous month, and 3·0 below that for the corresponding month of last year.

Deaths registered in these eight towns during the month numbered 2097, 1051 being of males and 1046 of females. They are 87 fewer than were registered in June, and 133 fewer than were registered in July 1907. The equivalent annual death-rate is 13·4 per thousand, a rate which is 1·1 less than that for June, and the same amount less than that for July of last year. The death-rate for the month ranged from 17·3 in Dundee to 10·7 in Aberdeen. In Glasgow it was 14·0; in Greenock 13·5; in Paisley 13·4; in Perth 12·1; in Edinburgh and in Leith 12·0. In Dundee and in Leith the death-rate is higher than in the previous month, but in the remaining towns it is lower than in that month.

Of the 2097 deaths, 689, or 32·9 per cent., were of children of less than five years old; and 551, or 26·3 per cent., were of persons of over sixty. The former are 25 more than in the previous month, but 53 fewer than in the corresponding month of last year; the latter are 33 fewer than in the previous month, but 3 more than in the corresponding month of last year.

Deaths of children of less than one year old numbered 417; they are 27 more than in June, but 3 fewer than in July of last year. The infantile mortality rate amounts to 102 per thousand of the average monthly number of births in these towns, a rate which is 3 more than that for June, and 1 more than that for July of last year. This rate varied from 137 in Dundee to 66 in Greenock. In Aberdeen it was 110; in Glasgow 108; in Leith 107; in Paisley 76; in Edinburgh and in Perth 75. In Glasgow, Dundee, Aberdeen, and Leith this rate was higher than that for the previous month, but in the remaining towns it was lower.

Deaths from the principal epidemic diseases numbered 196; they are 36 more than were registered in June, but 59 fewer than were registered in July of last year. The equivalent annual death-rate from these causes is 1·3 per thousand, a rate which is 0·2 more than that for June, but 0·4 less than that for July 1907. This rate ranged from 1·8 in Dundee to 0·7 in Paisley and in Perth. In Glasgow it was 1·5; in Leith 1·0; in Edinburgh and in Aberdeen 0·9; and in Greenock 0·8.

There were no deaths from small-pox in these towns during the month. Deaths from measles numbered 14, and are 24 fewer than in June, and 14 fewer than in July of last year. Deaths from scarlet fever numbered 7, from diphtheria 10, from typhus fever 1, and from enteric fever 4. Deaths from hooping-cough numbered 86; they are 26 more than in the previous month, but 17 fewer than in the corresponding month of last year. Deaths from diarrhoeal diseases numbered 56; they are 33 more than in the previous month, and 27 more than in the corresponding month of last year. Deaths from cerebro-spinal meningitis numbered 18; they are 9 more than in June, but 43 fewer than in July of last year. Of these 18 deaths, 15 were registered in Glasgow, 2 in Leith, and 1 in Edinburgh.

Deaths from influenza numbered 3; from puerperal septic conditions 7; from malignant disease 164, of which 90 were ascribed to carcinoma, 12 to sarcoma, and 62 to other or unspecified forms of cancer. Deaths from heart disease numbered 203; from apoplexies 129; from premature birth debility 69; and from alcoholism 10.

Deaths from pneumonia numbered 151, and constituted 7·2 per cent. of the total deaths for the month; they are 37 fewer than in the previous month, and 59 fewer than in the corresponding month of last year. Deaths from bronchitis numbered 88, and constituted 4·2 per cent. of the total deaths for the month; they are 21 fewer than in the previous month, and 29 fewer than in the corresponding month of last year.

Deaths from tuberculous disease numbered 291, and constituted 13·9 per cent. of the total deaths for the month; they are 72 fewer than in June, and 41 fewer than in July 1907. Of these deaths, 177 were due to phthisis, a number which is 30 fewer than in the previous month, and 29 fewer than in June 1907.

Deaths from violence numbered 113; of them 14 were suicidal, 7 being by hanging, 2 each by cuts, by precipitation, and by gun-shot wounds, and 1 by poison.

Of the persons whose deaths were registered during the month, 1 male and 6 females were aged ninety years and upwards, the oldest being a widow aged 97 years.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 110 is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated combined population of 801,044. Births registered in them during the month numbered 1915, marriages 599, and deaths 878. The equivalent annual birth-rate is 28·2 per thousand, the marriage-rate 8·8, and the death-rate 12·9. Compared with the rates for July 1907, the birth-rate is 0·1 lower, the marriage-rate 2·3 lower, and the death-rate 2·1 lower.

Among the deaths registered in these districts during the month there were 19 from measles, 4 from scarlet fever, 30 from hooping-cough, 10 from diphtheria, 2 from enteric fever, 40 from diarrhoeal diseases, 3 from laryngitis, 93 from pneumonia, bronchitis, and pleurisy, 130 from tuberculous diseases, and 3 from cerebro-spinal meningitis, of which 2 occurred in Shettleston, and 1 in Coatbridge.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 151 feet above the sea-level,

For the month of JULY 1908.

Mean barometric pressure, 29.949 inches; greater than the average for 1856–1905 by 0.057 inch.

Mean temperature, $58^{\circ}6$; greater by $0^{\circ}5$.

Mean daily range of temperature, $14^{\circ}9$; greater by $0^{\circ}7$.

Rain, number of days, 13; less by 3 days.

Rain, depth in inches, 2.86; less by 0.14 inch.

Wind, direction of: a 4 days' excess of winds from between NE. and SE.

Hence the month of July 1908 was characterised by a rather high mean pressure; a slightly high mean temperature, with a slightly high mean daily range; a fractionally low mean rainfall; an excess of winds from an Easterly quarter.

The mean pressure was 29.949 inches, or 0.057 inch above the normal, the sea-level extremes at Leith being 30.428 inches on 29th, and 29.200 inches on 17th.

The mean temperature was $58^{\circ}6$, or $0^{\circ}5$ above the normal, the days being $0^{\circ}8$ and the nights $0^{\circ}1$ above their respective averages. The differences for the individual towns ranged from an excess of $1^{\circ}4$ at Leith to a deficiency of $0^{\circ}5$ at Dundee. The warm weather which characterised the last few days of June continued into the early days of July, and very high temperatures were noted on 2nd, Paisley and Perth reaching 88° in the shade, Glasgow 85° , and Greenock 83° . During the second and third weeks temperature was rather below the normal; whilst towards the close of the month warmer conditions again prevailed. Lowest readings occurred on varying dates, the actual lowest being 39° at Aberdeen on 6th, and at Perth on 19th and 29th.

The mean rainfall was 2.86 inches, or 5 per cent. below the normal. Edinburgh, Leith and Greenock had a moderate excess, and the other towns a deficiency of varying amount. The first week was rainless, or nearly so, whilst unsettled conditions prevailed during the succeeding ten days. Leith had more than 1 inch of rain on 12th, and Glasgow three-quarters of an inch on 8th and again on 16th. During the last two weeks of the month but little rain fell, except about the 24th and 25th, Aberdeen reporting 0.83 inch on the latter day.

A severe thunderstorm occurred in Perthshire on 2nd, with heavy hail in places, and a thunderstorm at Glasgow on 16th.

On the nights of June 30th and July 1st, and more moderately on July 2nd, a remarkable sunset glow prevailed at midnight.

Bright sunshine was below the average.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

MONTHLY RETURN

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

AUGUST 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of August 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3841 living children, of whom 1910 were males and 1931 females. The births are 415 fewer than were registered in July, but 92 more than were registered in August of last year. The equivalent annual birth-rate is 24·6 per thousand of the estimated population of the eight towns, a rate which is 2·7 less than that for July, but 0·2 more than that for August 1907. The birth-rate for the month in these towns ranged from 32·5 in Greenock to 17·7 in Perth. In Glasgow it was 26·6; in Leith 26·4; in Dundee 26·1; in Edinburgh 21·2; in Paisley 20·1; and in Aberdeen 20·0.

Of the 3841 births, 316, or 8·2 per cent., were illegitimate. This illegitimate rate is 0·9 above that for the previous month, and 0·8 above that for the corresponding month of last year.

Marriages registered in these towns during the month numbered 1004; they are 871 fewer than were registered in July, but 29 more than were registered in August of last year. The equivalent annual marriage-rate is 6·4 per thousand, a rate which is 5·6 below that for the previous month, but 0·1 above that for the corresponding month of last year.

Deaths registered in these towns during the month numbered 2216, 1131 being of males and 1085 of females. They are 119 more than were registered in July, and 197 more than were registered in August 1907. The equivalent annual death-rate is 14·2 per thousand, a rate which is 0·8 above that for July, and 1·1 above that for August 1907. The death-rate for the month ranged from 16·7 in Greenock to 11·3 in Aberdeen. In Dundee it was 16·6; in Perth 15·1; in Glasgow 14·9; in Edinburgh 13·3; in Paisley 12·5; and in Leith 11·4. In Dundee, Paisley and Leith the death-rate was lower than in the previous month, but in the other towns it was higher.

Of the 2216 deaths, 820, or 37·0 per cent., were of children of less than five years old, and 507, or 22·9 per cent., were of persons of over sixty. The former are 131 more than in the previous month, and 184 more than in the corresponding month of last year; the latter are 44 fewer than in the previous month, and 14 fewer than in the corresponding month of last year.

Deaths of children of less than one year old numbered 540; they are 123 more than in July, and 156 more than in August 1907. The infantile mortality rate amounts to 132 per thousand of the average monthly number of births in these towns during last year, a rate which is 30 more than in the previous month, and 140 more than in the corresponding month of last year. This rate varied from 171 in Dundee to 77 in Leith. In Glasgow it was 151; in Edinburgh 122; in Perth 104; in Paisley 102; in Greenock 87; and in Aberdeen 79. In Aberdeen and in Leith this rate was lower than in the previous month, but in the remaining towns it was higher.

Deaths from the principal epidemic diseases numbered 284; they are 88 more than in the previous month, and 53 more than in the corresponding month of last year, the increase being due to the prevalence of diarrhoeal diseases. The equivalent annual death-rate from these causes is 1·8 per thousand, being 0·5 above that for July, and 0·3 above that for August of last year. This rate ranged from 2·9 in Dundee to 0·7 in Leith. In Glasgow it was 2·4; in Paisley 1·7; in Greenock and in Perth 1·3; in Edinburgh 0·9; and in Aberdeen 0·8.

There were no deaths from small-pox or from typhus fever registered in these towns during the month. Deaths from measles numbered 15, being 1 more than in July, but 4 fewer than in August 1907. Deaths from scarlet fever numbered 6, from diphtheria 17, and from enteric fever 15, the last named being 11 more than in the previous month, and 1 more than in the corresponding month of last year. Deaths from hooping-cough numbered 79; they are 7 fewer than in the previous month, and 14 fewer than in the corresponding month of last year. Deaths from diarrhoeal diseases numbered 133; they are 77 more than in the previous month, and 104 more than in the corresponding month of 1907. Deaths from cerebro-spinal meningitis numbered 19; they are 1 more than in July, but 29 fewer than in August 1907. Of these 19 deaths, 13 occurred in Glasgow, 5 in Edinburgh, and 1 in Dundee.

Deaths from influenza numbered 2; from puerperal septic infection 9; from malignant disease 144, of which 69 were ascribed to carcinoma, 8 to sarcoma, and 67 to cancer not otherwise defined. Deaths from heart disease numbered 244; from apoplexies 116; from premature birth debility 68; and from alcoholism 10.

Deaths from pneumonia numbered 127, and constituted 5·7 per cent. of the total deaths for the month; they are 24 fewer than in the previous month, and 12 fewer than in the corresponding month of last year. Deaths from bronchitis numbered 97, and constituted 4·4 per cent. of the total deaths for the month; they are 9 more than in the previous month, and 7 more than in the corresponding month of last year.

Deaths from tuberculous disease numbered 287, and constituted 13·0 per cent. of the total deaths for the month; they are 4 fewer than in July, but 6 more than in August of last year. Of these deaths, 168 were due to phthisis, being 9 fewer than in the previous month, but 1 more than in the corresponding month of last year.

Deaths from violence numbered 108; of them 6 were suicidal, 3 being by hanging, and 1 each by cuts, precipitation, and poisoning.

Deaths registered during the month include those of 3 males and 5 females aged ninety years and over. The oldest were a widow and a female fundholder, each of whom was aged 94 years.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 126 is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated combined population of 801,044. Births registered in them during the month numbered 1734, marriages 293, and deaths 893. The equivalent annual birth-rate is 25·5 per thousand, the marriage-rate 4·3, and the death-rate 13·1. Compared with the rates for August 1907, the birth-rate is 0·5 lower, the marriage-rate 0·4 lower, and the death-rate 0·9 higher.

Among the deaths registered in these districts during the month there were 1 from measles, 4 from scarlet fever, 37 from hooping-cough, 9 from diphtheria, 7 from enteric fever, 109 from diarrhoeal diseases, 1 from laryngitis, 82 from pneumonia, bronchitis, and pleurisy, 126 from tuberculous diseases, and 5 from cerebro-spinal meningitis, of which 2 occurred in Coatbridge, and 1 each in Falkirk, Haddington, and Kilmarnock.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 151 feet above the sea-level,

For the month of AUGUST 1908.

Mean barometric pressure, 29.906 inches; greater than the average for 1856–1905 by 0.048 inch.

Mean temperature, $57^{\circ}1$; less by $0^{\circ}2$.

Mean daily range of temperature, $15^{\circ}7$; greater by $1^{\circ}6$.

Rain, number of days, 15; less by 2 days.

Rain, depth in inches, 2.84; less by 0.64 inch.

Wind, direction of: a 2 days' excess of winds from W. and NW.

Hence the month of August 1908 was characterised by a slightly high mean pressure; a fractionally low mean temperature, with a high mean daily range; a rather low mean rainfall; a slight excess of winds from W. and NW.

The mean pressure was 29.906 inches, or 0.048 inch above the normal, the sea-level extremes at Leith being 30.374 inches on 2nd, and 29.140 inches on 28th.

The mean temperature was $57^{\circ}1$, or $0^{\circ}2$ below the normal, the days being $0^{\circ}7$ above and the nights $0^{\circ}9$ below their respective averages. At none of the towns was the difference from the normal as much as 1° . Early in the month temperature was rather above the average for the time of year, all the towns recording their maxima on the 2nd, when Dundee reached 81° in the shade, Paisley 80° , and Leith and Perth 79° . During the second and third weeks somewhat cold weather was experienced in most districts, the lowest readings for the month occurring on 12th or 13th. As regards the chief towns the actual minima were 34° at Perth on 12th, and 36° at Aberdeen on 13th.

The mean rainfall was 2.84 inches, or 18 per cent. below the normal. Greenock and Paisley had fully their average amounts, but the other towns deficiencies ranging from 12 per cent. at Perth to fully 50 per cent. at Leith. Except for rather heavy falls on 9th, when Greenock had 0.90 inch, the fine weather of the closing weeks of July continued throughout the first three weeks of August. During the last ten days unsettled conditions prevailed, with heavy falls on 26th and 31st. On each of these days Greenock reported more than 1 inch, whilst a fall of 1.35 inch at Dundee on 31st was half the total there for the entire month.

A thunderstorm occurred at Perth on 24th, and in several districts on 28th.

The closing days of the month were marked by stormy weather, a destructive gale prevailing on 31st.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of AUGUST 1908.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

SEPTEMBER 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of September 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3700 living children, of whom 1871 were male and 1829 female. These births are 141 fewer than those registered in August, but 148 more than those registered in September of last year. The equivalent annual birth-rate is 24·5 per thousand of the estimated population of these towns, a rate which is 0·1 less than that for August, but 0·6 more than that for September of last year. The birth-rate for the month ranged from 29·5 in Leith, to 20·3 in Edinburgh. In Glasgow it was 25·9; in Greenock, 25·1; in Dundee, 24·8; in Aberdeen, 24·2; in Paisley, 23·7; and in Perth, 21·8.

Of the 3700 births, 295, or 8·0 per cent., were illegitimate. This rate is 0·2 less than that for August, but 0·9 more than that for September of last year, and ranged from 9·3 in Edinburgh, Dundee, and Aberdeen, to 4·0 in Paisley. In Greenock it was 8·8; in Perth, 7·9; in Glasgow, 7·7; and in Leith, 4·9.

Marriages registered in these towns during the month numbered 1097; they are 93 more than those registered in August, but 99 fewer than those registered in September of last year. The equivalent annual marriage-rate is 7·3 per thousand, a rate which is 0·9 above that for August, but 0·7 below that for September of last year.

Deaths registered in these towns during the month numbered 2099, of which 1074 were of male persons, and 1025 of female persons. These deaths are 117 fewer than those registered in August, but 103 more than those registered in September of last year. The equivalent annual death-rate is 13·9 per thousand, a rate which is 0·3 less than that for August, but 0·5 more than that for September of last year. The death-rate for the month ranged from 14·8 in Glasgow, to 10·0 in Perth. In Dundee it was 14·6; in Edinburgh, 13·9; in Greenock, 13·9; in Leith, 12·9; in Paisley, 12·3; and in Aberdeen, 10·7. The death-rates of Edinburgh and Leith are higher than those for August, but the death-rates of the other six towns are less than those for that month.

Of the 2099 deaths registered during the month, 752, or 35·8 per cent., were of

children of less than five years old, and 515, or 24·5 per cent., of persons of over sixty. The former are 68 fewer than in August, but 94 more than in September of last year; the latter are 8 more than in August, but 8 fewer than in September of last year.

Deaths of children of less than one year old numbered 521; they are 19 fewer than were registered in August, but 99 more than were registered in September of last year. The infantile mortality rate amounts to 132 per thousand of the average monthly number of births registered last year, a rate which is the same as that for August, but is 28 more than that for September of last year. This rate ranged from 142 in Glasgow, to 62 in Perth. In Edinburgh it was 138; in Leith, 132; in Aberdeen, 130; in Greenock, 130; in Paisley, 105; and in Dundee, 97. In Glasgow, Dundee, and Perth this rate was less than in the previous month, but in Edinburgh, Aberdeen, Paisley, Leith, and Greenock it was more than in that month.

Deaths from the principal epidemic diseases numbered 216; they are 68 fewer than in August, but 14 more than in September of last year. The equivalent annual death-rate from these causes is 1·4 per thousand, a death-rate which is 0·4 less than that for August, but is the same as that for September of last year. This death-rate ranged from 1·9 in Greenock, to 0·3 in Perth. In Glasgow it was 1·8; in Dundee, 1·6; in Paisley, 1·6; in Aberdeen, 1·0; in Leith, 0·9; and in Edinburgh, 0·8.

There were no deaths from small-pox registered in these towns during the month. Deaths from measles numbered 10, and are 5 fewer than in August and 4 fewer than in September of last year. Deaths from scarlet fever numbered 10, from typhus fever 1, from enteric fever 9, and from diphtheria 26. The last-named are 9 more than in August and 14 more than in September of last year, and of them 17 were registered in Glasgow and 5 in Paisley. Deaths from hooping-cough numbered 56; they are 23 fewer than those in August and 11 fewer than those in September of last year. Deaths from diarrhoeas numbered 90; they are 43 fewer than those registered in August, but 38 more than those registered in September of last year. Deaths from cerebro-spinal meningitis numbered 14; they are 5 fewer than in August, and 30 fewer than in September of last year; of them 11 were registered in Glasgow, and 1 each in Edinburgh, Aberdeen and Greenock.

Deaths from influenza numbered 3; from puerperal septic conditions 8; and from malignant disease 175, of which 98 were ascribed to carcinoma, 9 to sarcoma, and 68 to other or unspecified forms of cancer. Deaths from heart disease numbered 205; from apoplexies 128; from premature birth debility 66; and from alcoholism 5.

Deaths from pneumonia numbered 143, and constituted 6·8 per cent. of the total deaths for the month; they are 16 more than those registered in August, but 16 fewer than those registered in September of last year. Deaths from bronchitis numbered 98; they are 1 more than those registered in August, and 13 more than those registered in September of last year.

Deaths from tuberculosis numbered 236, and constituted 11·2 per cent. of the total deaths for the month; they are 51 fewer than those registered in August, and 33 fewer than those registered in September of last year.

Deaths from violence numbered 92; of them 11 were suicidal, 5 being by hanging, 2 by drowning, 2 by precipitation, and 1 each by strangulation and by unstated means.

Of those dying during the month, 2 males and 7 females were aged ninety years and upwards. The oldest of them was a retired joiner aged 96.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 142 is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated population of 801,044. Births registered in them during the month numbered 1734, marriages 389, and deaths 879. The equivalent annual birth-rate is 26·4, the marriage-rate 5·9, and the death-rate 13·4. Compared with the rates for September 1907, the birth-rate is 0·6 higher, the marriage-rate 1·1 lower, and the death-rate 1·3 higher.

Among the deaths registered in these districts during the month there were 5 from measles, 10 from scarlet fever, 27 from hooping-cough, 2 from diphtheria, 1 from typhus fever, 15 from enteric fever, 65 from diarrhoeas, 1 from laryngitis, 92 from pneumonia, bronchitis, and pleurisy, 102 from tuberculosis, and 2 from cerebro-spinal meningitis.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 151 feet above the sea-level,

For the month of SEPTEMBER 1908.

Mean barometric pressure, 29.845 inches; less than the average for 1856-1905 by 0.031 inch.

Mean temperature, $54^{\circ}2$; greater by $0^{\circ}5$.

Mean daily range of temperature, $11^{\circ}5$; less by $1^{\circ}8$.

Rain, number of days, 23; greater by 7 days.

Rain, depth in inches, 4.50; greater by 1.33 inch.

Wind, direction of: winds from W. on 4 days fewer than usual, with a corresponding excess from N.E. and S.

Hence the month of September 1908 was characterised by a slightly low mean pressure; a slightly high mean temperature, with a small mean daily range; a high mean rainfall, with a large number of days with rain; a defect of Westerly winds.

The mean pressure was 29.845 inches, or 0.031 inch below the normal, the sea-level extremes at Leith being 30.144 inches on 4th and 29.157 inches on 9th.

The mean temperature was $54^{\circ}2$, or $0^{\circ}5$ above the normal, the days being $0^{\circ}4$ below and the nights $1^{\circ}4$ above their respective averages. The differences for the individual towns ranged from an excess of $1^{\circ}1$ at Leith to a defect of $0^{\circ}6$ at Dundee. During the first half of the month temperature was much below the average, with lowest readings on 5th or 12th. Thereafter warmer conditions prevailed, with very high readings at the close of the month, the nights being exceptionally mild. Thus, at Leith during the night of 29th-30th the shade temperature did not fall below 63° .

As regards the chief towns, the shade extremes were 73° at Leith on 30th and 33° at Perth on 5th and 12th.

The mean rainfall was 4.50 inches, or 42 per cent. above the normal, this being the highest mean for September since 1896. All the towns had more than their normal allowance, the excess ranging from 87 per cent. at Dundee to 6 per cent. at Glasgow. Greenock had as much as 9.53 inches, whilst the total of 4.80 inches at Dundee was the heaviest September rainfall at that place since 1869. Very heavy rains took place between 5th and 8th, Greenock reporting more than 1 inch on 5th and on 6th, and fully $2\frac{1}{2}$ inches on 7th. Dundee on 7th registered 1.48 inches, and Perth and Paisley more than 1 inch. Rain fell on 25 days at Perth, and everywhere the number of rain days was unusually large for September.

Thunder occurred at Glasgow on 10th, at Leith on 15th, and at Glasgow and Perth on 26th.

Bright sunshine was much below the average, and fog was rather frequent, at least in the East.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,
During the Month of SEPTEMBER 1908.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

OCTOBER 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of October 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3946 living children, of whom 1970 were male and 1976 female. These births are 246 more than those registered in the eight towns in September, but 255 fewer than those registered in them in October of last year. The equivalent annual birth-rate is 25·3 per thousand of the estimated population of these towns, a rate which is 0·8 more than that for September, but 2·0 less than that for October of last year. The birth-rate for the month ranged from 29·8 in Dundee, to 21·2 in Edinburgh. In Leith it was 29·2; in Greenock, 27·1; in Glasgow, 25·8; in Aberdeen, 25·4; in Perth, 23·1; and in Paisley, 22·6.

Of the 3946 births, 290, or 7·3 per cent., were illegitimate. This rate is 0·7 less than that for September, but 0·3 more than that for October of last year, and ranged from 10·4 in Aberdeen, to 4·3 in Leith. In Edinburgh it was 9·7; in Dundee, 7·7; in Glasgow, 6·5; in Greenock, 6·1; in Paisley, 5·8; and in Perth, 5·8.

Marriages registered in these towns during the month numbered 919; they are 178 fewer than in September, and 228 fewer than in October of last year. The equivalent annual marriage-rate is 5·9 per thousand, a rate which is 1·4 less than that for September, and 1·6 less than that for October of last year.

Deaths registered in these towns during the month numbered 2153, of which 1072 were of males, and 1081 of females. These deaths are 54 more than those registered in September, but 106 fewer than those registered in October of last year. The equivalent annual death-rate is 13·8 per thousand of the estimated population, a rate which is 0·1 less than that for September, and 0·9 less than that for October of last year. The death-rate for the month ranged from 15·9 in Dundee, to 11·8 in Edinburgh. In Glasgow it was 14·6; in Aberdeen, 13·6; in Paisley, 13·4; in Leith, 12·5; in Greenock, 12·3; and in Perth, 12·1. The death-rates of Dundee, Aberdeen, Paisley, and Perth for the month are higher than those for September, but those of Glasgow, Edinburgh, Leith, and Greenock are less than the corresponding death-rates for September.

Of the 2153 deaths registered during the month, 743, or 34·5 per cent., were of children of less than five years old, and 545, or 25·3 per cent., were of persons of over sixty. The former are 9 fewer than in September, and 3 fewer than in October of last year. The latter are 30 more than in September, but 20 fewer than in October of last year.

Deaths of children of less than one year old numbered 507; they are 14 fewer than in September, but 44 more than in October of last year. The infantile mortality rate amounts to 124 per thousand of the average monthly number of births registered in these towns last year. This rate is 8 less than that for September, but 13 more than that for October of last year. It ranged from 153 in Dundee and Leith, to 90 in Perth. In Aberdeen it was 136; in Glasgow, 128; in Paisley, 102; in Edinburgh, 97; and in Greenock, 93. In Dundee, Aberdeen, Leith, and Perth, this rate was higher in this than in the previous month, but in Glasgow, Edinburgh, Paisley, and Greenock it was less than in that month.

Deaths from the principal epidemic diseases numbered 197; they are 19 fewer than in September, and 48 fewer than in October of last year. The equivalent annual death-rate from these causes is 1·3 per thousand, a death-rate which is 0·1 less than that for September, and 0·3 less than that for October of last year. This death-rate ranged from 2·0 in Dundee, to 0·3 in Perth. In Paisley it was 1·8; in Glasgow, 1·5; in Aberdeen, 1·0; in Greenock, 1·0; in Edinburgh, 0·7; and in Leith, 0·4.

There were no deaths from small-pox registered in these towns during the month. Deaths from measles numbered 6; they are 4 fewer than in the previous month, and 54 fewer than in October of last year. Deaths from scarlet fever numbered 16, from enteric fever 6, and from diphtheria 36. The last-named are 10 more than in September, and 13 more than in October of last year; of them 18 were in Glasgow and 6 in Paisley. Deaths from hooping-cough numbered 58; they are 2 more than in September, but 2 fewer than in October of last year. Deaths from diarrhoeas numbered 67; they are 23 fewer than in September, but 15 more than in October of last year. Deaths from cerebro-spinal meningitis numbered 8; they are 6 fewer than in September, and 21 fewer than in October of last year; all eight were registered in Glasgow.

Deaths from influenza numbered 2; from puerperal septic conditions, 4; and from malignant disease 144, of which 76 were ascribed to carcinoma, 7 to sarcoma, and 61 to other or unspecified forms of cancer. Deaths from heart disease numbered 218; from apoplexies, 110; from premature birth debility, 78; and from alcoholism, 5.

Deaths from pneumonia numbered 170, and constituted 7·9 per cent. of the total deaths registered during the month; they are 27 more than in the previous month, but 39 fewer than in October of last year. Deaths ascribed to bronchitis numbered 108, and constituted 5·0 per cent. of the total deaths for the month; they are 10 more than in September, but 20 fewer than in October of last year.

Deaths from tuberculosis numbered 280, and constituted 13·0 per cent. of the total deaths registered during the month; they are 44 more than were registered in September, but 42 fewer than were registered in October of last year. These deaths include 178 from phthisis, a number 31 more than in September, but 19 fewer than in October of last year.

Deaths from violence numbered 95; of them only one was registered as being suicidal.

Among those whose deaths were registered during the month there were 7, all females, who were aged ninety years and over; the oldest of them was a widow aged 97.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 158 is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated combined population of 801,044. Births registered in them during the month numbered 1784, marriages 311, and deaths 951. The equivalent annual birth-rate is 26·2, the marriage-rate 4·6, and the death-rate 14·0. Compared with the rates for September the birth-rate is 0·2 less, the marriage-rate 1·3 less, but the death-rate 0·6 more. Compared with the rates for October of last year this birth-rate is 0·7 more, the death-rate 0·8 more, but the marriage-rate is 0·3 less.

Among the deaths registered in these districts during the month there were 2 from measles, 4 from scarlet fever, 20 from hooping-cough, 9 from diphtheria, 10 from enteric fever, 2 from typhus fever, 84 from diarrhoeal diseases, 4 from croup and laryngitis, 135 from bronchitis, pneumonia, and pleurisy, 109 from tuberculous diseases, and 2 from cerebro-spinal meningitis.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 151 feet above the sea-level,

For the month of OCTOBER 1908.

Mean barometric pressure, 30.099 inches; greater than the average of 1856–1905 by 0.279 inch.

Mean temperature, $53^{\circ}1$; greater by $6^{\circ}2$.

Mean daily range of temperature, $11^{\circ}0$; less by $0^{\circ}6$.

Rain, number of days, 14; less by 3 days.

Rain, depth in inches, 1.86; less by 1.59 inch.

Wind, direction of: a 7 days' excess of winds from between E. and S.

Hence the month of October 1908 was characterised by an abnormally high mean pressure; an abnormally high mean temperature, with a slightly low mean daily range; a low mean rainfall; a large excess of winds from a South-easterly quarter.

The mean pressure of 30.099 inches was 0.279 inch above the normal, and the highest mean for October hitherto recorded. At Leith the sea-level extremes were 30.555 inches on 22nd and 29.686 inches on 10th, pressure there falling below 30 inches only between 8th and 14th, and on 28th and 30th.

The mean temperature was $53^{\circ}1$, or as much as $6^{\circ}2$ above the normal, the days being $5^{\circ}9$ and the nights $6^{\circ}5$ above their respective averages. The temperature excess was strongly marked in all districts, and the month was decidedly the mildest October for at least fifty years. Conditions at the beginning of the month were entirely abnormal, the 1st being at Edinburgh the warmest day of the present year, and practically the only cold weather experienced was from 23rd to 26th. The highest shade readings reported from the chief towns were 77° at Glasgow on 1st, and 76° at Edinburgh and Paisley on that day and at Perth on 4th; the lowest, 26° at Perth on 25th and 26th.

The mean rainfall was 1.86 inches, or 43 per cent. below the normal. Greenock had only one quarter of its average, and there was a decided defect at all the chief towns, except at Dundee, where there was a slight excess, and at Aberdeen, where the shortage amounted to only 12 per cent. There were many rainless days; on others the amounts recorded were very trifling, and practically the only heavy falls occurred on 18th, 19th, or 27th. On 19th a heavy rainstorm visited some Eastern districts, Aberdeen registering about $1\frac{3}{4}$ inches for that day.

Fog was frequent throughout the month.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

NOVEMBER 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of November 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3423 living children, of whom 1718 were male and 1705 female. These births are 523 fewer than those registered in October, and 232 fewer than those registered in November of last year. The equivalent annual birth-rate is 22·7 per thousand of the estimated population of these towns, a rate which is 2·6 less than that for October, and 1·9 less than that for November of last year. The birth-rate for the month ranged from 24·6 in Greenock, to 18·0 in Perth. In Leith it was 24·3; in Aberdeen, 23·9; in Glasgow, 23·8; in Dundee, 23·5; in Paisley, 21·7, and in Edinburgh, 18·7.

Of the 3423 births registered, 248, or 7·2 per cent., were illegitimate. This rate is 0·1 less than that for the previous month, but is 0·5 more than that for November 1907. It ranged from 11·0 in Dundee, to 4·1 in Leith. In Perth it was 9·6; in Edinburgh, 9·3; in Aberdeen, 8·3; in Glasgow, 6·3; in Greenock, 5·5; and in Paisley, 4·3.

Marriages registered in these towns during the month numbered 921; they are 2 more than in the previous month, but 17 fewer than in November of last year. The equivalent annual marriage-rate was 6·1 per thousand, a rate which is 0·2 more than that for October, but 0·2 less than that for November of last year.

Deaths registered in these eight towns during the month numbered 2504, of which 1246 were of males, and 1258 of females. These deaths are 351 more than those registered in October, but 2 fewer than those registered in November of last year. The equivalent annual death-rate is 16·6 per thousand of the estimated population, a rate which is 2·8 more than that for October, but is 0·2 less than the death-rate for November of last year. The death-rate for the month ranged from 18·7 in Dundee, to 12·9 in Paisley. In Glasgow it was 17·6; in Greenock, 17·1; in Leith, 17·0; in Edinburgh, 15·2; in Perth, 15·2; and in Aberdeen, 13·9. In each of these towns, Paisley excepted, the death-rate for this month was higher than that for October.

Of the 2504 deaths, 850, or 33·9 per cent., were of children of less than five years old, and 678, or 27·1 per cent., were of persons of over sixty. The former are 107

more than in October, but 103 fewer than in November of last year. The latter are 133 more than in October, and 81 more than in November of last year.

Deaths of children of less than one year old numbered 530; they are 23 more than in October, but 18 fewer than in November of last year. The infantile mortality rate amounts to 134 per thousand of the monthly average number of births registered in these towns during last year. This rate is 10 more than that for October, but 2 less than that for November of last year. It ranged from 217 in Leith, to 77 in Perth. In Greenock it was 198; in Dundee, 164; in Paisley, 131; in Glasgow, 125; in Edinburgh, 122; and in Aberdeen, 114. In Glasgow, Aberdeen and Perth, this rate was lower in this than in the preceding month, but in Edinburgh, Dundee, Paisley, Leith and Greenock it was higher.

Deaths from the principal epidemic diseases numbered 190; they are 7 fewer than in October, and 132 fewer than in November of last year. The equivalent annual death-rate from these causes is 1·3 per thousand, a rate which is the same as that for October, but 0·9 less than that for November of last year. This death-rate ranged from 1·6 in Glasgow, to 0 in Perth. In Aberdeen it was 1·3; in Dundee, 1·2; in Leith, 1·2; in Greenock, 1·0; in Paisley 0·9; and in Edinburgh, 0·6.

There were no deaths from small-pox registered in these towns during the month. Deaths from measles numbered 6; they are of the same number as in the previous month, but 141 fewer than in November of last year. Deaths from scarlet fever numbered 33, from diphtheria 37, and from enteric fever 16, 15 of which were in Glasgow. The last-named are 10 more than in October, and 8 more than in November of last year. Deaths from hooping-cough numbered 57, of which 42 were registered in Glasgow; they are 1 fewer than in October, and 6 fewer than in November of last year. Deaths from diarrhoeas numbered 35; they are 32 fewer than in October, and 7 fewer than in November of last year. Deaths from cerebro-spinal meningitis numbered 5; they are 3 fewer than in October, and 16 fewer than in November of last year; all five were registered in Glasgow.

Deaths from influenza numbered 8; from puerperal septic conditions, 11; from malignant disease 181, of which 96 were ascribed to carcinoma, 12 to sarcoma, and 73 to other or unspecified forms of cancer. Deaths from heart disease numbered 277; from apoplexies, 130; from premature birth debility, 69; and from alcoholism, 9.

Deaths from pneumonia numbered 334, and constituted 13·3 per cent. of the total deaths; they are 164 more than in October, and 54 more than in November of last year. Deaths from bronchitis numbered 225, and constituted 9·0 per cent. of the total; they are 117 more than in October, and 25 more than in November of last year.

Deaths from tuberculosis numbered 294, and constituted 11·7 per cent. of the total deaths; they are 14 more than in October, and 3 more than in November of last year. These deaths include 196 from phthisis, a number which is 18 more than in October, and 22 more than in November of last year.

Deaths from violent causes numbered 85; of them 4 were ascribed to suicide, 2 being by hanging, 1 by cutting, and 1 by unstated means.

Among those whose deaths were registered in these towns during the month there were 4 males and 9 females aged ninety years and upwards; the oldest of them was a widow of a lieutenant-general, aged 102.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 174 is given the usual monthly statement regarding the births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated combined population of 801,044. Births registered in them during the month numbered 1589, marriages 297, and deaths 1044. The equivalent annual birth-rate is 24·2, the marriage-rate 4·5, and the death-rate 15·9. Compared with the rates for October the birth-rate is 2·0 less, the marriage-rate 0·1 less, but the death-rate 1·9 more. Compared with the rates for November of last year the birth-rate is 0·2 less, the marriage-rate 0·4 less, but the death-rate is 1·0 more.

Among the deaths registered in these districts during the month there were 3 from measles, 5 from scarlet fever, 18 from diphtheria, of which 5 were in Dumbarton; 18 from hooping-cough, of which 5 were in Arbroath; 4 from enteric fever, 3 from cerebro-spinal meningitis, 31 from diarrhoeas, 2 from laryngitis, 1 from croup, 224 from pneumonia, bronchitis, and pleurisy, and 130 from tuberculosis.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 151 feet above the sea-level,

For the month of NOVEMBER 1908.

Mean barometric pressure, 29·907 inches; greater than the average of 1856–1905 by 0·066 inch.

Mean temperature, $44^{\circ}2$; greater by $2^{\circ}6$.

Mean daily range of temperature, $10^{\circ}0$; greater by $0^{\circ}1$.

Rain, number of days, 18; greater by 2 days.

Rain, depth in inches, 2·55; less by 0·84 inch.

Wind, direction of: a 4 days' excess of winds from S. and S.W.

Hence the month of November 1908 was characterised by a rather high mean pressure; a high mean temperature, with an average mean daily range; a rather low mean rainfall; a considerable excess of winds from S. and S.W.

The mean pressure was 29·907 inches, or 0·066 inch above the average. At Leith the sea-level extremes were 30·380 inches on 30th, and 28·882 inches on 22nd.

The mean temperature was $44^{\circ}2$, or $2^{\circ}6$ above the normal, days and nights being both above their respective averages by that amount. The temperature excess was well marked at all the chief towns, ranging from $3^{\circ}3$ at Greenock to $1^{\circ}8$ at Aberdeen. Cold weather was experienced around the 10th and 20th, and on the former day the sheltered thermometer at Perth did not rise above the freezing point. As a rule, however, mild conditions prevailed, and these were most pronounced during the first and last weeks of the month. The highest shade reading reported from the chief towns was 57° , which occurred at Glasgow on 7th, at Greenock on 11th, and at Leith as late in the month as 28th; the lowest, 24° , at Paisley on 9th.

The mean rainfall was 2·55 inches, or 25 per cent., below the normal. Aberdeen had only half its average, and the other towns defects of varying amount, ranging down to 13 per cent. at Greenock and Paisley. But little rain fell early in the month, whilst the heaviest falls occurred on 24th, 25th or 27th. On 27th Greenock registered 1·10 inch and Paisley 0·66 inch, and on 25th Perth reported 0·63 inch. At Aberdeen no day had a fall of as much as $\frac{1}{4}$ inch.

A rapid fall of the barometer on 22nd was followed by a general gale from West and South-west, and for a few days thereafter rather stormy weather prevailed.

Fog was somewhat frequent, especially during the first half of the month.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

DECEMBER 1908.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of December 1908 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3730 living children, of whom 1919 were male, and 1811 female. These births are 307 more than those registered in November, but 179 fewer than those registered in December 1907. The equivalent annual birth-rate is 23·9 per thousand of the estimated population of these towns, a rate which is 1·2 higher than that for November, but 1·5 lower than that for December 1907. The birth-rate for the month ranged from 28·1 in Greenock, to 17·7 in Perth. In Glasgow it was 25·6; in Dundee, 25·6; in Aberdeen, 23·3; in Leith, 23·1; in Paisley, 21·8; and in Edinburgh, 19·8.

Of the 3730 births registered during the month, 239, or 6·4 per cent., were illegitimate. This illegitimate rate is 0·8 less than that for November, and 0·5 less than that for December 1907. It ranged from 9·1 in Aberdeen, to 1·2 in Greenock. In Dundee it was 7·6; in Glasgow, 6·5; in Edinburgh, 6·5; in Leith, 5·4; in Perth, 3·8; and in Paisley, 3·6.

Marriages registered in these eight towns during the month numbered 1262; they are 341 more than those registered in November, but 324 fewer than those registered in December of the previous year. The equivalent annual marriage-rate is 8·1, a rate which is 2·0 above that for November, but 2·2 below that for December 1907.

Deaths registered in these towns during the month numbered 2551, of which 1222 were of males, and 1329 of females. These deaths are 47 more than those registered in November, but 545 fewer than those registered in December of the previous year. The equivalent annual death-rate is 16·3 per thousand, a rate which is 0·3 less than that for November, and 3·8 less than that for December 1907. The death-rate of these eight towns for this December is the lowest of the December death-rates of these towns recorded; the previous lowest, 17·6, was that of December 1905. The death-rate for the month ranged from 20·7 in Dundee, to 13·6 in Leith. In Greenock it was 18·2; in Glasgow, 16·6; in Edinburgh, 15·8; in Perth, 14·4; in Aberdeen, 14·1; and in Paisley, 13·8. In Glasgow, Leith, and Perth the death-rate for this month was less than that for the previous month, but in the other five towns it was more than that for the previous month.

Of the 2551 deaths, 812, or 31·8 per cent., were of children of less than five years old, and 727, or 28·5 per cent., were of persons of over sixty. The former are 38 fewer than in November, and 427 fewer than in December of the previous year. The latter are 49 more than in November, but 12 fewer than in December of the previous year.

Deaths of children of less than one year old numbered 476; they are 54 fewer than in November, and 213 fewer than in December 1907. The infantile mortality rate amounts to 117 per thousand of the monthly average number of births registered in these towns, a rate which is 17 below that for November, and 48 below that for December of the previous year. This infantile mortality rate ranged from 171 in Dundee, to 60 in Perth. In Aberdeen it was 118; in Edinburgh, 115; in Glasgow, 114; in Leith, 102; in Paisley, 96; and in Greenock, 93. In Dundee and Aberdeen this rate is higher than in November, but in the remaining six towns it is lower.

Deaths from the principal epidemic diseases numbered 186; they are 4 fewer than in November, and 322 fewer than in December 1907. The equivalent annual death-rate from these causes is 1·2 per thousand, a rate which is 0·1 less than that for November, and 2·1 less than that for December 1907. This death-rate ranged from 1·7 in Glasgow, to 0 in Leith. In Dundee it was 1·3; in Paisley, 1·2; in Aberdeen, 1·1; in Greenock, 0·7; in Edinburgh, 0·4; and in Perth, 0·3.

There were no deaths from small-pox registered in these towns during the month. Deaths from measles numbered 5; they are 1 fewer than in November, and 275 fewer than in December of the previous year. Deaths from diphtheria numbered 36, from enteric fever 6, and from scarlet fever 15. Deaths from whooping-cough numbered 96, of them 73 being in Glasgow; they are 39 more than in November, but 1 fewer than in December 1907. Deaths from diarrhoeas numbered 18; they are 17 fewer than in November, and 20 fewer than in December of last year. Deaths from cerebro-spinal meningitis numbered 10; they are 5 more than in November, but 10 fewer than in December of the previous year; of them 9 were registered in Glasgow, and 1 in Edinburgh.

Deaths from influenza numbered 6; from puerperal septic conditions, 7; from malignant disease, 182, of which 103 were ascribed to carcinoma, 7 to sarcoma, and 72 to other or unspecified forms of cancer. Deaths from heart disease numbered 248; from apoplexies, 136; from premature birth debility, 71; and from alcoholism, 7.

Deaths from pneumonia numbered 275; they constituted 10·8 per cent. of the total deaths, and are 59 fewer than in November, and 96 fewer than in December 1907. Deaths from bronchitis numbered 214; they constituted 8·4 per cent. of the total deaths for the month, and are 11 fewer than in November, and 85 fewer than in December of the previous year.

Deaths from tuberculosis numbered 309, and constituted 12·1 per cent. of the total deaths. These deaths are 15 more than in November, but 24 fewer than in December 1907; of them 184 were ascribed to phthisis, a number which is 12 less than in November, and 32 less than in December of the previous year.

Deaths from violence numbered 117; of them 7 were stated to be suicidal, 4 being by hanging, and 1 each by cutting, coal-gas poisoning, and opium poisoning.

Among those whose deaths were registered during the month there were 4 males and 10 females aged 90 years and upwards. The oldest of them was a widow aged 98.

BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 190 is given the usual monthly statement regarding births, marriages, and deaths in forty-eight selected registration districts. These districts have an estimated combined population of 801,044. Births registered in them during the month numbered 1741, marriages 490, and deaths 1009. The equivalent annual birth-rate is 25·6, the marriage-rate 7·2, and the death-rate 14·8. Compared with the rates for November the birth-rate is 1·4 more, the marriage-rate 2·7 more, and the death-rate 1·1 less. Compared with the rates for December of the previous year, the birth-rate is 1·8 less, the marriage-rate 2·0 less, and the death-rate 3·9 less.

Among the deaths registered in these districts during the month there were 10 from measles, 6 from scarlet fever, 20 from whooping-cough, 21 from diphtheria, of which 5 were in Govan and 3 in Shettleston, 4 from enteric fever, 20 from diarrhoeas, 2 from cerebro-spinal meningitis, of which 1 was in New Monkland and 1 in Shettleston, 172 from pneumonia, bronchitis, and pleurisy, and 127 from tuberculosis.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 151 feet above the sea-level,

For the month of DECEMBER 1908.

Mean barometric pressure, 29.767 inches; less than the average of 1856-1905 by 0.032 inch.

Mean temperature, $39^{\circ}5$; greater by $0^{\circ}8$.

Mean daily range of temperature, $10^{\circ}3$; greater by $1^{\circ}2$.

Rain, number of days, 19; greater by 2 days.

Rain, depth in inches, 3.12; less by 0.60 inch.

Wind, direction of: a 7 days' excess of winds from between S.E. and S.W.

Hence the month of December 1908 was characterised by a slightly low mean pressure; a slightly high mean temperature, with a rather high mean daily range; a somewhat low mean rainfall; and a large excess of winds from southerly quarter.

The mean pressure was 29.767 inches, or 0.032 inch below the normal, the sea-level extremes at Leith being 30.374 inches on the morning of 1st and 28.665 inches on the night of 10th.

The mean temperature was $39^{\circ}5$, or $0^{\circ}8$ above the normal, the days being $1^{\circ}4$ and the nights $0^{\circ}2$ above their respective averages. The almost continuously mild weather for which the months of October and November were remarkable was prolonged until about the 24th of December, and temperature was frequently very greatly above the average for the time of year. Highest readings were recorded between 20th and 22nd, Glasgow, Greenock, and Leith reaching 54° in shade. On 25th, with a shift of wind to S.E., a short spell of severe cold set in with very low day and night temperatures, but at the close of the month mild conditions again prevailed. The lowest shade readings at the large towns were 18° at Perth on 28th and 30th, and 19° at Edinburgh on 29th. At Edinburgh (Blackford Hill Observatory) the highest day temperature on 29th was only 24° , whilst on 31st it was 48° .

The mean rainfall was 3.12 inches, or 16 per cent. below the normal. The distribution was very irregular. Thus, Aberdeen with more than 5 inches had an excess of nearly 60 per cent., and Leith with only $\frac{3}{4}$ inch a deficiency of about 70 per cent., whilst, in the west, Greenock had a slight excess and Glasgow a deficiency of nearly 30 per cent. Greenock had falls of 1 inch or over on 5th and 7th, and Aberdeen similar large falls on 27th and 28th, the amounts on the latter dates consisting largely of snow. At Leith only one day had a fall exceeding one-tenth of an inch.

From 26th to 30th weather of a very wintry type prevailed, and on 27th a severe snowstorm became general. With strong winds from S.E. the storm was of the nature of a blizzard, and for a day or two extensive snowdrifts completely disorganised the railway service in several districts. On 31st the snow had largely disappeared.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of DECEMBER 1908.
